GCSE FOOD PREPARATION & NUTRITION: The Food Investigation Assessment (NEA1)

Dear Parent/Guardian,

Further to my recent letter about NEA 1, I now want to confirm the allocated date that your child will do the experimental work for this task.

It is Monday 11/ 18/25 November, between 1 and 4 p.m.

Please make arrangements for your child to get home after school that day.

Your child is investigating the use of different raising agents in making scones. They will be bringing home the experimental scones they have made during the practical session.

These will need to be tasted and tested on a variety of criteria by at least 5 people at home. More details will be given nearer the time, but please support your child in this very important part of the task.

As before, please contact me at school if you have any questions!

Yours sincerely,

Jeanette Birch
