

Friday 4th October 2019

Dear Parent/Guardian,

At St Thomas More, we are dedicated to supporting your child to achieve their full potential in all areas. Within the Mathematics Department, we would like for each of our students to be registered to www.diagnosticquestions.com. This is a relatively new platform, consisting of diagnostic or hinge questions. It will allow students to benefit from regular assessment, feedback and guidance on which topics require more work, as well as recommended materials. The site is free-to-use, but does require us to receive parents' permission before we allow them to sign up. For a student to set up an account, the site requires their name, DOB, gender and email address. The site's purpose is to collect and share data with the class teacher, regarding each student's response to questions specifically set to identify individual misconceptions.

To access the site's full terms of service and privacy policy, please visit the above website address.

If you are happy for your child to register for an account, please sign and return the slip to Amy on Reception **no later than Wednesday 9th October 2019**.

Thank you

Kerry Taylor
The Mathematics Department, St Thomas More School.

-
- I am happy for my child to register for an account with diagnosticquestions.com
- I do not wish for my child to register their details with diagnosticquestions.com

Student Name: _____ Year: _____

Parent/Guardian Signature: _____ Date: _____
